Market goes full throttle for 3rd day,

Sensex spurts 364 pts

MUMBAI : The post-budget glow continued for the third day in a row as the sensex on Thursday soared 364 points to 24,607 nearly one month high driven by a buying uptick

amid positive global cues. Most Asian indices ended on a firm footing, tracking overnight gains in the US on the back of solid job numbers and strength in commodities, which cheered up investors.

Buying accelerated on expectations that RBI would reciprocate the government's commitment to fiscal prudence with a rate cut sooner than later after a private survey showed that services sectors activity fell to a 3- month low amid muted growth in new orders.

The 30-share sensex ended the session at 24,607, its highest closing since February 8, up 364 points. This is its best three-day gain since September 2013. The gauge had gained 1,241 points in the previous two sessions after the presentation of the budget 2016-17. The Nifty regained control of the crucial 7,400-mark and added 106.75 points at 7,476 at the close.

Lending more shine to the growth story, the International Monetary Fund (IMF) has said it expects India to grow at 7.3% this fiscal and 7.5% next year even as recovery remains uneven, which boosted sentiment. Data showed that Foreign Institutional Investors, who had been major sellers for several sessions, net bought shares worth Rs 1,437.50 crore in Wednesday's trade, adding to level of optimism.
